ANDERSON'S SUPERB NAMED GLADIOLI NOVELTIES AND OTHER SPECIAL VARIETIES

FOR POSTAGE, SEE INSIDE BACK COVER

Our Gladioli corms, full size, heavy and healthy when grown as advised on inside back cover, produce results that satisfy the most critical gardeners.

We discard all kinds which have been out-classed by newer varieties in the same colour, and thus fewer names appear in our list. This procedure guarantees that only kinds of outstanding quality are catalogued. We are able, however, to supply many named varieties not listed, but we recommend those named in the following pages.

Varieties marked with an asterisk (*) are specially recommended to exhibitors—they should also be first choice for the garden.

Varieties without an asterisk should not be overlooked, however, as their superb colouring, large blooms and splendid stems more than atone for the little irregularities which debar them from the show bench.

- | | |
|--------------------|--|
| *BLACK OPAL | Perfectly formed flowers of magnificent rich, marbled dark crimson—a very dark red capable of consistently producing fine exhibition spikes of ten or eleven blooms open at once. Destined for world-wide popularity 3/6 |
| *BRONZEWING | A brilliant mixture of orange, salmon and slate, with a powdered crimson and yellow throat. Opens ten flowers on a light, strong stem. Recommended for exhibition and decorative use. Particularly attractive under artificial light. Outstanding 7/6 |
| BRUNO | Medium-sized flowers of coppery shade overlaid and edged slate with brown centre, faintly lined with crimson. Ten flowers open together on long spikes. Unusual and attractive 5/- |
| CABARITA | Shapely flowers of clear mid-blue, with claret centre edged deeper blue. Eight perfectly placed flowers open together make a striking spike. Growth tall and strong. Recommended 7/6 |
| *CORAL GLOW | A beautiful and distinct coral-red self; opens at least ten well-formed flowers on an exhibition spike; rigid stem and good growth. Excellent garden variety. Magnificent colour, especially under artificial light 5/- |
| DON BRADMAN | Perfectly formed flowers of light apricot, suffused salmon, well-placed on sturdy spike. A "Picardy" seedling that opens and stands heat well. Outstanding new variety that can be highly recommended 10/- |
| *ELANORA | Flower and spike similar in size and formation to "Red Lory," but of rich, dark maroon-purple self. Under artificial light the colour is best described as dark wine; about ten blooms open at once. Magnificent exhibition variety 5/- |
| *GLENORA | Mahogany red with darker flecking at the edges, the centres of lower petals crimson, bordered with powdered gold. Large flowers of good type and substance, well placed on the spike, nine or ten being open together. Distinct. A fine exhibition variety 7/6 |
| *GOOLARA | Upper petals are creamy white, two lower petals of bright yellow, making a showy, attractive flower. Beautifully waved blooms—ten or more open at once—in perfect formation, carried on tall spikes. Invaluable for both exhibition and decorative use 7/6 |

KILLARA.

ELANORA.

These two choice varieties are included in our Black and White Collection. (See Inside Front Cover.)

***HINDENBURG'S
MEMORY**

The most striking Gladiolus in its colour class—huge, shapely flowers of deep scarlet-red and well placed on a tall, vigorous spike. The best exhibition variety in this colour yet produced.
Price 10/-

INDIGO

Five or six large flowers of rich violet blue open on a good, firm spike. Has a strong constitution rare amongst the blues. Similar to "Aida," but much larger and of better colour 5/-

***JANET PURCELL**

Perfectly formed beautiful clear pink blooms with pale cream blotch, each floret faultlessly placed on a long, vigorous spike that opens twelve at once. Outstanding both as exhibition and cut flower. Recommended to exhibitors 10/-

ANDERSON'S SUPERB GLADIOLI

- ***JALNA** Unusual smoky colour of iridescent salmon and ashes of roses, ten or more large well-placed blooms. Splendid for exhibition. Price 7/6
- JOSEF HAYDN** Light heliotrope violet with effective dark violet blotch on lower petals. Large florets of splendid substance well placed on straight, slender stem. A very fine variety 5/-
- ***KILLARA** This variety consistently throws spikes of fine length opening, in pyramid form, about twelve large blooms of salmon-pink with creamy centre lined with deeper salmon. Excellent for exhibition. Highly recommended 5/-
- ***KOALA** The ground colour is creamy-pink, overlaid with golden sheen, the yellow throat powdered brown. Opens up to ten flowers, and has admirable decorative habits of stem and growth. Should be very popular. Distinct and attractive 5/-
- KOMIRI** Splendid florets of light pink with large white throat, the petal edges flaked with rose, and the whole flower overlaid with lilac. Unusual and attractive 7/6
- LOWANA** A first-rate decorative with fine all-round qualities—colour, fine stem, growth and form. Eight large shapely flowers of distinct glowing rose, with deeper rose centre, open together 5/-
- ***MARGARET JOAN** Large, well-formed flowers of deep shell pink deepening to orange-pink in the throat, carried perfectly on an ideal stem that seldom requires staking. Magnificent spikes of ten to twelve flowers opening at once. A really outstanding exhibition and decorative Gladiolus 7/6

- MAYA MAID** A most distinctive and unusual novelty of russet brown colour. Splendid spikes of well-formed flowers. Highly recommended to growers interested in novelties 4/-
- ***MERRIWA** A fine, tall, exhibition type, producing long spikes of ten or more shapely flowers, perfectly placed. Florets deep rose heavily flaked and striped rose-crimson; centre deeper rose faintly dotted white. Recommended 3/6
- ***MIKADO** A most reliable exhibition variety of silver, heavily overlaid and flecked with slate and salmon, with an unusual centre of crimson, cream and plum. Flowers of good size, form and texture, perfectly placed on a splendid stem. Faultless exhibition variety 3/6
- ***MRS. G. G. ERREY** This wonderful variety has flowers of creamy white with deeper cream centre, occasionally flushed pale pink in very hot weather. Large flowers of wonderful form and texture, perfectly placed on long spikes—eleven or twelve blooms open at once—make a faultless exhibition spike. Perhaps the easiest Gladiolus to grow to Championship standard 7/6
- ***MURALLA** This fine variety opens up to twelve well-formed, attractively waved flowers of silvery pink, with small petunia and cream mark in the throat. Long, symmetrical spike—a popular type and wonderful florists' flower 5/-
- NAROOMA** An attractive bright magenta purple self of excellent decorative habit, with about eight nice blooms out at once. Good stem; worthy of a place in any collection 5/-

ANDERSON'S SUPERB GLADIOLI

NEW ERA	One of the most beautiful Gladiolus yet produced. Each large heavily frilled and ruffled floret is the most delightful shade of soft pink. The blooms are perfectly placed on a splendid stem. This variety is assured of popularity, and should have a place in every collection 10/-
OPAL QUEEN	A huge flower that is most attractive. The florets of orange-yellow have a smoky tongue and vein the centre of the flower. Splendid spike and a most elegant cut flower 6/-
*ORANA	Remarkable for large exhibition spikes consistently opening fourteen flowers of salmon-pink with a scarlet and crimson throat. An "Edith Robson" type, but with more flowers open at once. Very popular with exhibitors 7/6

PFITZER'S MASTERPIECE	Well-formed florets of light salmon-pink, with effective cream blotch, perfectly placed on a good spike. Of splendid substance, this variety stands the hot weather well. One of the best yet introduced 5/-
*RED ENSIGN	Bright scarlet with conspicuous white lower petals margined scarlet. Similar to "Victor," but larger and stronger. Up to eight or ten splendid blooms open on good spike. Should be very popular 5/-
*ROSE DAWN	Large, beautifully waved flowers of glowing old rose with deeper rose in the centre. Magnificent for decorative purposes, yet capable of producing high-class exhibition spikes. One of the best all-round commercial varieties, delightfully distinctive and highly recommended 3/6
SPANISH CAVALIER	Beautiful shapely flowers of the most brilliant red with creamy throat—a striking combination. Long, symmetrical spike of attractive form. Good stem 4/-
*TARONGA	Lilac magenta with contrasting cream throat, ten flowers open at once on a splendid spike. Very strong constitution, whereas most others in this colour class are notoriously weak 5/-
TUNIAS TRIUMPH	Claimed by S.A. experts to be one of the best yet introduced. Magnificent florets of a light orange-scarlet of splendid form and substance, places this variety well ahead in the new giant class. Recommended 5/-
VAGABOND PRINCE	Garnet brown, with a small striking blotch of glowing flame, scarlet on lip of petal—a very distinct gorgeous colour that attracts attention everywhere. Good spike 3/6
*VISTA BONITA	Immense flowers of the new and very delightful geranium pink. Another variety in the new giant class, yet having a refinement that will be difficult to beat. Probably one of the most beautiful introduced for a very long time. Recommended for exhibitors particularly 10/-

WARATAH.

LUCIFER.

These two choice varieties are included in the Black and White Collection. (See Inside Front Cover.)

***WAHROONGA**

Beautiful and distinct vieux rose, deeper in throat and flecked dark rose on the edges. Ruffled flowers of good size and excellent substance on a splendid spike make this valuable for exhibition and decorative use **7/6**

***WALLAROY**

Large flowers of white with distinct pale magenta throat marking, edged and lined with cream and placed in good formation. Ten or more open at once. Excellent for exhibition, a splendid decorative for commercial purposes **7/6**

**WINGS OF
SONG**

A magnificent new variety bearing large flowers of clear pink with a light blotch. Perfect formation and a long, sturdy spike. A variety that will be well displayed on the exhibition bench. **10/-**

ANDERSON'S SUPERB "ALL-COLOURS" MIXTURE

Our "All-Colours" Mixture is composed mostly of excellent un-named varieties that are too close in colour and character to existing varieties to be listed separately, and of splendid named sorts of which we have too large a stock. Thus, our mixture becomes really a collection of most desirable varieties that enables home gardeners, and others, to make a magnificent display—many of the spikes being up to exhibition form—at surprisingly small outlay.

Bulbs, all of good size, are in every respect sound, clean and healthy, and we recommend our "All-Colours" Mixture to our clients without hesitation.

PRICES: 4d. each; 3/- doz.; 11/- 50; 20/- 100.

ANDERSON'S SUPERB GLADIOLI

CULTURAL HINTS

For extraordinary growth depth of colour and perfection of form, Gladioli demand three points of attention. Rich, deep, well-drained and properly cultivated soil, ample water in the growing season and sunshine.

Dig the soil deeply, incorporating with the lower layers ample quantities of well-decayed cow or stable manure or, if these properties are not available, Peatmoss mixed with a small amount of Anderson's Excellenta. Never use fresh unrotted animal manure. See that all water in heavy soil is able to get away from the sub-soil quickly. Make sure that the roots never lack water when once the bulbs start to sprout but, at the same time, that too much water is not given.

Do not expect results if Gladioli are planted in cold, draughty places where the sun does not shine. On the other hand, in the very warm districts, or if bulbs are planted late in the season, choose a spot where the bulbs and growth will be protected at the hottest part of the day.

Plant deeply. A full-sized corm may be put in four to five inches from the surface in medium to light soil. In heavy soil, three to four inches will be quite deep enough. Bulbs planted nearer the surface seldom flower freely.

In warm climates, if plenty of water is available, "Glads." may be planted all the year round, but the best colour and largest flowers are produced by planting June to August—several successional plantings may be made during this period. Where summers are very hot and dry and winters cold and wet, two main plantings are made—one in August or early September, and the other in December or January.

When the flower spike appears, keep the water well up to the plants, and give occasional dressings of weak liquid manure, two or three applications at fortnightly intervals will be enough.

An advantage Gladioli have over other bulbs is that they may be lifted a few weeks after flowering. It is not necessary to wait for the foliage to die back completely. When the growth is brown or yellow, about half to 2-3rds of the length, loosen the soil around each bulb and, a week or ten days after, dig. Tie in small bunches and hang where the growth may die off. When this has taken place, cut the growth away and store the bulbs in a dry place until needed again.

Varieties marked with an asterisk (*) are specially recommended to exhibitors—they should also be first choice for the garden.

Varieties without an asterisk should not be overlooked, however, as their superb colouring, large blooms and splendid stems more than atone for the little irregularities which debar them from the show bench.

We will gladly pay postage on all orders of 20/- and over for NAMED Gladioli. Postage should be added for smaller orders, and orders for Mixed Gladioli, at the following rates:—

N.S.W. **2d.** each; **6d.** for 6 bulbs; **1/-** for 12 bulbs; **2/-** for 50 bulbs
Interstate **2d.** each; **6d.** for 6 bulbs; **1/6** for 12 bulbs; **3/6** for 50 bulbs

Mrs. G. G. ERREY.

Large, creamy-white flowers with a deeper cream centre are sometimes flushed pale pink in the very hot weather. These magnificent blooms are perfectly placed on long stems and make a faultless exhibition spike. This variety—one of the easiest of all to grow to championship form will be the choice of amateur and exhibitor alike. It is included in our Black and White Collection. (See Inside Front Cover.)
